

T5 Data Science BootCamp

Airline-Passenger-Satisfaction

Objective:

1. Study and know the extent of customer satisfaction with their trips.
2. Recommendations from customers on trips.
3. Gradual application of the appropriate model, as I will do a classification only, if I can develop the model to a better model, what is the objection.

Dataset:

Data provided by Kaggle has been used in this project.

Project work steps:

1. Data Exploration.
2. Data Preprocessing.
3. Classification.
4. Evaluation.

The next phase:

I will apply the work steps for the project, and if the result is excellent, I will develop it and apply it to any model that has been studied.
